DETAILED ACTION

1. The Amendment filed by Applicant on 06/04/2010 has been entered.
2. Claim 34 is cancelled.
3. Claims 10-29, 33 and 35 are pending.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 10-29, 33 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Dang et al., U.S. Patent No. 6,677,395 (hereinafter "Dang"). Dang teaches suitable olefin polymers useful as the irradiated and oxidized or non-irradiated and non-

oxidized olefin polymers are propylene polymer materials, ethylene polymer materials, butane-1 polymer materials, and mixtures thereof. See Dang, col. 2, lines 40-44. Dang teaches a butene-1 polymer with a melt flow rate of 0.5 to 150. See Dang, col. 4, lines 31-53. Deng further teaches the use of additive in an amount of 9.0 to 85.0 wt. %. With respect to claim 35, the transitional phrase "consisting essentially of" limits the scope of a claim to the specified materials or steps "and those that do not materially affect the basic and novel characteristic(s)" of the claimed invention. In re Herz, 537 F.2d 549, 551-52, 190 USPQ 461, 463 (CCPA 1976). For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." If an applicant contends that additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention. In re De Lajarte, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). Thus, claims 10-29, 33 and 35 is rejected as anticipated by Dang.
